

## Leeds hosts Sectorial Workshop on 2 February 2017

THE VENUE: WEETWOOD HALL, LEEDS, UK

**What are the key barriers to exploiting nano and micro fluidics? What opportunities does this technology offer industry? What new developments are on the horizon?**

All these questions and more will be answered during the Net Market Fluidics (NMF) Sectorial Workshop being held on 2nd February at the University of Leeds, UK.

The workshop will bring together leading academics in the fields of nano and micro fluidics, along with industrial partners who are looking for new innovations in this area. Companies already working in the area are invited, as are companies wanting to learn about the potential opportunities in many different market sectors from manufacturing to sensors and from printing to food production.

The workshop will also give delegates an opportunity to network and to discover how this emerging area offers potential solutions to technical challenges faced by your business.

To learn more about the workshop and to register for attendance, please contact: Dr. Harvey M. Thompson at: [H.M.Thompson@leeds.ac.uk](mailto:H.M.Thompson@leeds.ac.uk).

### Join the Network

It takes just 10 minutes to build your **FREE** Network profile and begin connecting with colleagues. Once a Member, you can:

- Find new industrial or academic partners that can provide new technologies or finance reesearch
- Post or search job proposals for new opportunities
- Promote your technologies at the European level and foster future H2020 calls on your activities
- And more!

**Get started today at:**

### Set up a Meeting

Upcoming nano and micro fluidics events:

- PolyNano - Bringing nano and microfluidic technologies to the market,**  
*Copenhagen, Denmark, 13 Dec 2016*
- International MicroNanoConference**  
*Amsterdam, The Netherlands, 13-14 Dec 2016*
- Organ-on-a-Chip Europe 2017**  
*Munich, Germany 10-11 May 2017*
- Organ-on-a-Chip World Congress & 3D-Culture 2017**  
*Boston, USA, 10-11 July 2017*
